DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 15, 2005 has been entered. The cancellation of claims 2 and 5 is acknowledged.

Claims 1, 3-4, 8, 10, 37-51 are pending.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The instant claims are directed to a method of increasing locomotor function and/or neuromuscular strength in patients with spinal cord injury or motor neuron degeneration by employing the herein recited β -agonists. The cited prior arts do not fairly suggest or teach such method. The closest prior art would be Murphy and Stone. However, Murphy does not teach the instant invention because claims 1, 3, 40, and 51 are directed to treatment of patients with lower thoracic spine or directed to specific β -agonist not disclosed in Murphy. The teachings of Stone does not make obvious to one of ordinary skill in the art to increase the locomotor function and/or neuromuscular strength of the specific patient population. Furthermore, the later publication of Stone, reference of record

provided by the applicant, would discourage one of ordinary skill in the art to even try the use of β -agonist for the treatment of spinal cord injury.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1, 3-4, 8, 10, 37-51 are allowed.
